## Sildenafil Citrate 50 mg

Sildenafil Professional 50 mg was developed for men who cannot achieve a permanent erection. The reasons for this problem can be entirely different. This is smoking, alcohol, stress at work, or weakening of the body after a serious illness. The sexual enhancer helps to overcome all barriers that lie on the way to high-quality sexual intercourse. In addition, the award was accepted for everyone.

## Sildenafil Professional 50 mg

[Sildenafil Citrate 50 mg](#) – quickly solves erectile problems. One tablet is enough to get a long-term erection. Numerous studies allow that the functional systems in male bodies are not impaired. It is completely safe, even in everyday use. The winning price is perfect with a range of

### Sildenafil Citrate benefits

- Lasting result
- high degree and security
- stronger sensations during the act of love

The active ingredient Sildenafil Citrate increases the sensitivity of the genitals. Rapid recovery even after intercourse for endless intimate enjoyment. Each tablet is equipped with a special bladder that allows you to quickly absorb the walls of the stomach. Sildenafil Professional 50 mg reaches the genitals with the blood and promotes erection. The substance does not affect the existing function, does not change the composition of the sperm and is completely excluded from the body.

## Instructions for use

A tablet is able to overcome a difficult erection and complications after intimate problems. Statistics show that the tool also successfully copes with full erectile dysfunction by 70%. To get the desired result, you need to take a pill with a glass of water 30 minutes before sexual intercourse.

Follow the instructions on the packaging. Do not experiment with the dosage, do not try to increase the effect of the drug with other drugs. Extensive tests have made Sildenafil completely harmless to health. It does not contain hormonal substances, does not affect the functionality of other organs. Side effects are extremely rare. A small percentage of men feel dizzy and have a blood wound on their face. Such manifestations are extremely rare and occur primarily in the early stages of Medicin. Adverse effects that you consult a specialist before you buy the product.

Large doses of sildenafil can be harmful to people with allergen, cardiovascular, kidney, and gastrointestinal tract diseases. Don't forget that alcohol and fats reduce the strength of the active ingredient.

## Sildenafil in foods

The substance sildenafil is not found in food. Sildenafil is a synthetic chemical substance that is obtained with the help of a special chain. And it's pretty hard to get hold of, so it won't be possible to go through a chain of chemical conversions in your own kitchen.

Men looking to find a natural substitute for sildenafil can take the following food products that are considered aphrodisiacs. Aphrodisiacs traditionally include all products of animal or vegetable origin that increase potency and improve male function.

### To date, aphrodisiacs are the following products:

- aloe
- anise
- oysters
- avocado
- artichoke
- ginseng
- chocolate
- honey
- olive oil
- coffee
- mushrooms
- bananas

- strawberry
- sea kale
- dates
- coconut
- pine nut
- horseradish
- onions
- garlic
- carrots
- dill
- celery
- asparagus
- eggs
- Caviar
- Prawns
- Mussels
- Snails
- Saffron
- Vanilla
- Ginger
- Cinnamon

## **Sildenafil Professional 50mg**

Sildenafil Professional 50 mg is a new generation drug with the active ingredient Sildenafil Citrate. Active ingredient with special additives that not only improve potency, but also increase intimate desire, are optimally balanced.

Sildenafil Professional 50 mg is not a hormone preparation, its mechanism of action lies exclusively on another level and only influences the erectile mechanisms. The main effect is an internal increase in blood flow in the genital organ. Highly selective effect of Sildenafil Professional 50 mg, exclusively on the reproductive system and does not affect the work of other organs and systems in the body, as a result of which the side effects are less common than with other agents of this group against impotence.

### **use**

In old age men suffering from various types of erectile dysfunction.

## Instructions for use

Before starting treatment with Sildenafil Professional, seek medical advice from your doctor in order to avoid possible side effects and adjust the dosage of Sildenafil Professional according to your age and illness. Improper use of the drug can complicate existing problems.

## Possible restrictions when taking Sildenafil Professional

- Contraindicated in patients with sildenafil intolerance
- Patients with leukemia, myeloma, severe forms of anemia
- Severe anatomical dislocations of the penis
- High risk of bleeding

A single dose of Sildenafil Professional is 50 mg, this dosage lasts up to 7-8 hours. The Sildenafil Professional tablet should be washed with water, do not combine Sildenafil with alcohol, especially strong and in large doses. Use Sildenafil Professional should be 40-50 minutes before the planned intimate act.

## The main advantages of the drug:

- The time of the positive effect is twice as long as with the usual Sildenafil preparations and can last up to 8 hours
- Improves libido and accordingly the desire
- Ability to have multiple orgasms

Numerous clinical studies with Sildenafil have shown no harmful effects on the body, in some cases it may increase blood flow, which can cause severe reddening of the face, dizziness and short-term fainting.
